### PROJECTS

#### Taskora ( Task Management System ) [🔗](#)

Technology Used: Vanilla PHP, Sql, Javascript, Bootstrap CSS

- Built a simple project tool for teams to create, assign, and track tasks easily
- Admins, managers, and members have clear roles with specific task and project
- Structured code following MVC architecture with repository and container patterns

#### Workopia Laravel [🔗](#)

Technology Used: Laravel, Alpine.js, and Tailwind CSS

- Built a straightforward job platform with intuitive search and helpful filters
- Allowed users to apply, save jobs, and keep their profiles up to date with resumes
- Enabled employers to get applicant emails, review resumes, and manage postings

#### Natours WebApp [🔗](#)

Technology Used: Expres.js, Mongodb, Pug, Mongoose

- Created an app designed for adventure lovers to explore and find new tours
- Used Mapbox API to show various tour locations clearly on an interactive map
- Implemented JWT authentication with user roles to secure access and features

### WORK EXPERIENCE

#### Universal Access and Systems Solutions

2024 - 2025

Technical Support Representative

- Assisted customer with network troubleshooting and software issue via email and chat
- Collaborated with other department such as Netops, Billing and Dispatch Team to improve service handling
- Recorded technical issues, created tickets, and escalated complex concerns to senior technical staff for prompt resolution.

#### Canon

2022 - 2024

Data Entry Specialist

- Processed logistics documents like bill of lading and invoices statement
- Managed accurate records of freight in transits and warehouse stock
- Automated the input of freight invoices to streamline the billing process, reduce manual errors, and increase overall efficiency.
